GROUP EX - CLASS DESCRIPTIONS

Cycling (45 min): During this class, the instructor will guide you through a ride set to motivational music that is sure to get you sweating! All fitness levels welcome. (Please arrive early to ensure proper bike set up).

Cycling + Core (60 min): This class will consist of a 45 minute ride on the bike followed by a 10 minute core training routine. (Please arrive early to ensure proper bike set up).

Circuits (45 min): These functionally-based workouts will have you moving quickly from one exercise to the next. By utilizing various exercise equipment and formats, this class will help you increase overall muscular endurance, work capacity, and deep core muscles and abdominals to support the spine, and improve posture.

Bags, Bells, & Beyond (45 min): A strength workout utilizing non-traditional equipment and unorthodox methods (kettle bells, sandbags, stones, etc.) to get you fit.

Run Club: Grab your running buddy or come get one at this multi-level run club! Run various trails on NAS Whiting Field and challenge yourself every other Saturday. Earn a Club shirt after your third meeting!

Yoga Flow (60 min): Take this more traditional yoga class that focuses on matching breath to movement. Movements can be varied to accommodate all fitness levels.

Flex + Flow Yoga (45 min): This class takes yoga moves and add weights with higher reps to focus on muscular endurance and core strength. Movements can be varied to accommodate all fitness levels.

Yoga Core (40 minutes): Flow through moves that will challenge your core strength and muscular endurance while also providing the stretching benefits of yoga.

HIIT + Core (45 minutes): This class will take you through intervals of high intensity exercises to challenge your cardiovascular fitness and endurance followed up by a core burnout.

Strength: Lower body, Upper body, Total Body (45 minutes): Put your muscles to the test with this class that will focus primarily on the use of free weights to build strength and improve body composition. You will learn proper mechanics and techniques to safely and effectively build muscle and strength.

Beginner Weight Training (60 min): A class that introduces patrons to the foundational principles and movement patterns governing strength development. The focus will be on developing technical proficiency in basic movement patterns and understanding exercise selection and sequencing for optimal performance.

Intermediate Weight Training (60 min): This class is a progression from beginner weight training. All of the foundational principles developed in the beginner course will now be refined. More complex movement patterns will be introduced. Included, but not limited to: altering time under tension, implementing supersets and compound sets, and force production from asymmetrical platforms.
